We are pleased to announce the 10x Genomics Single Cell Grant Program. This award includes Project Consultation, support on sample preparation and library construction, QC and additional help from the NGS platform and 10x Genomics for a pilot project using one of these single cell sequencing applications from 10x Genomics:

- Chromium Single Cell Gene Expression
- Chromium Single Cell Immune Profiling
- Chromium Single Cell ATAC

The 3 winners will be selected and awarded (1) 4-reaction Chromium single cell solution kit, along with support on library preparation, QC and sequencing from the NGS Platform and 10x Genomics.

Enter your abstract starting February 14, 2022 through March 14, 2022.

Projects proposed should complete experiments before December 31, 2022.
